

Shaik Mahammad Shariff

Software Engineer - Full-Stack Development - Python - Java - React - Scalable Systems

23bq1a04f2@vvit.net - +91-7842238548 - Guntur, Andhra Pradesh, India - [Portfolio](#) - [LinkedIn](#) - [GitHub](#) - [CodeChef](#)

CodeChef 3 - DSA Rating ~1823 - Global Rank 192

PROFESSIONAL SUMMARY

Final-year B.Tech student in Electronics and Communication Engineering (Expected Graduation: May 2027, CGPA: 8.21/10) with hands-on Software Engineering experience across the full Software Development Life Cycle (SDLC). Skilled in full-stack development using Python, Java, JavaScript/TypeScript, React, Next.js, and SQL, with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming applied to building scalable, maintainable systems. Experienced designing and testing REST APIs, debugging production code, and collaborating in Agile, Git-based team workflows. Strong problem solver focused on clean code and continuously learning new technologies.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming
- **Software Engineering:** Debugging, Version Control, Problem Solving
- **Frameworks and Libraries:** React.js, Next.js, Flask, Prisma, Bootstrap
- **Cloud:** AWS (Cloud Practitioner)
- **DevOps:** Docker (basic), GitHub
- **Databases:** Supabase, Prisma ORM
- **Developer Tools:** Git, GitHub, VS Code, Google Workspace
- **Machine Learning & AI:** Machine Learning, Scikit-learn, XGBoost, Large Language Models, Prompt Engineering

PROJECTS

FarmLink AI [[GitHub](#) - [Live Demo](#)] - Next.js, React, TypeScript, Prisma, Supabase, Docker

- Architected and developed a full-stack SaaS platform connecting farmers, buyers, and logistics providers, including a crop-diagnosis and price-prediction feature.
- Implemented secure authentication, application workflows, real-time bidding via Socket.IO, and a Supabase-backed database layer with a responsive front end.
- Tested, debugged, and deployed the application using Docker and version control, improving scalability and maintainability.

CreditGuard AI [[GitHub](#) - [Live Demo](#)] - Python, Flask, XGBoost, Docker, GitHub Actions

- Built an end-to-end software application for credit approval prediction, with a model layer achieving 66.67 percent recall using SMOTE and XGBoost, validated by a 108/108 passing test suite.
- Designed responsive Flask dashboards and automated regression testing with GitHub Actions for continuous integration.
- Containerized and deployed the application using Docker.

Sales and Revenue Analytics [[GitHub](#) - [Live Demo](#)] - Python, Pandas, Scikit-learn

- Engineered analytics dashboards processing approximately 540,000 records using Python and Pandas, with customer segmentation and revenue forecasting logic.
- Automated data-cleaning pipelines to improve data quality and built interactive visualizations for reporting.

Bucks2Bar [[GitHub](#) - [Live Demo](#)] - JavaScript, Chart.js, Vitest

- Built a personal finance dashboard using modular JavaScript architecture, with automated unit tests (Vitest) to ensure code quality and maintainability.

EXPERIENCE

AIML Domain Intern, SkillWallet / SmartBridge

June 2026 - Present

- Collaborated with the engineering team using Git-based workflows to design, develop, and test machine learning applications in Python.
- Debugged and validated feature engineering and data preprocessing pipelines using Scikit-learn to improve code reliability and correctness.
- Documented implementation details and built reusable, maintainable modules following software engineering best practices.

Additional Internships: Prompt Engineering (SkillCraft Technology), AI/ML (CodTech IT Solutions), AWS Data Engineering (EduSkills / AWS Academy)

Apr 2025 - Jul 2026

- Built LLM-integrated automation workflows, Python-based ML solutions, and AWS cloud/networking labs across three short-term programs, applying debugging and Linux/cloud deployment practices.

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT) - Bachelor of Technology, Electronics and Communication Engineering
2023 - Present

CGPA: 8.12 out of 10 - **Expected Graduation: April 2027**

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**, Amazon Web Services (Validated, Issued July 2026, Valid through July 2029) - [Verify](#)
- AWS Academy Graduate, Data Engineering (Credly-verified) - [View](#); GitHub Foundations - [View](#); Google Cloud Skills Boost - [View](#)
- Java Programming, CodeChef - [View](#); Git and GitHub Bootcamp, Udemy - [View](#); Cybersecurity Fundamentals, Palo Alto Networks - [View](#)
- Job Simulations (Forge): GenAI Powered Data Analytics (Tata), Automation AI Accelerator (Datacom)
- Full list of 25+ certifications available at portfolio: [skmdshariff143-ai.github.io](#)

LEADERSHIP AND ACHIEVEMENTS

- NSS Student Coordinator, VVIT - Led 20+ community service events for 100+ volunteers.
- Represented Andhra Pradesh at the National Integration Camp (NIC), Bihar.

LANGUAGES

English (Professional), Telugu (Native), Urdu (Native), Hindi (Professional)
