

Shaik Mahammad Shariff

ECE Undergraduate | AI & Software Developer

23BQ1A04F2@vit.net | Guntur, Andhra Pradesh | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [CodeChef](#)

PROFESSIONAL SUMMARY

Electronics and Communication Engineering undergraduate with a **8.21/10 CGPA** and practical experience developing AI/ML and full-stack prototypes. Comfortable with Python, Java, machine-learning workflows, data analysis, and modern web technologies. AWS Certified Cloud Practitioner with project and internship exposure in AI, prompt engineering, and cloud data engineering; seeking internship and entry-level AI or software-development opportunities.

TECHNICAL SKILLS

Programming: Python, Java, Data Structures, Algorithms, Object-Oriented Programming, Problem Solving

AI & Data: Machine Learning, Generative AI, Prompt Engineering, LLMs, AI Agents, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib

Web, Cloud & Tools: Flask, Next.js, React, TypeScript, Prisma, Supabase, Git, GitHub, Docker, AWS Cloud Fundamentals

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT) | 2023 - Present

B.Tech in Electronics and Communication Engineering | **CGPA: 8.21/10** | Expected Graduation: May 2027

PROJECTS

FarmaLink-AI | Next.js, React, TypeScript, Prisma, Supabase | [GitHub](#) | [Live Demo](#)

- Built a marketplace prototype connecting farmers with buyers, logistics providers, and cold-storage partners.
- Implemented modular workflows for crop listings, disease diagnostic assistance, price simulations, and transaction tracking using a Prisma/Supabase data layer.

CreditGuard AI - Credit Card Approval Prediction | Python, Scikit-learn, XGBoost, Flask, Docker | [GitHub](#) | [Demo](#)

- Developed an end-to-end classification workflow for credit applicant risk analysis, including preprocessing, model evaluation, and explainable output.
- Created Flask dashboards for predictions and model metrics, with automated testing and Docker-based packaging.

EXPERIENCE

AI/ML Domain Intern - Skill Wallet / SmartBridge | 2025 - Present

Developing applied machine-learning projects, including the CreditGuard AI prediction workflow.

Prompt Engineering Intern - SkillCraft Technology | June 2026

Practiced structured prompting, prompt evaluation, and AI workflow design for large language models.

Artificial Intelligence Intern - CodTech IT Solutions | June - July 2026

Completed a four-week program covering machine-learning fundamentals, intelligent systems, and practical problem solving.

AWS Data Engineering Virtual Intern - EduSkills / AWS Academy | April - June 2025

Completed cloud data-engineering modules covering storage, processing, and analytics workflows.

CERTIFICATIONS

AWS Certified Cloud Practitioner - Amazon Web Services | Issued July 17, 2026 | Expires July 17, 2029 | [Certificate](#) | [Verify](#)

Additional: AWS Data Engineering Virtual Internship (EduSkills), Hands-on Generative AI Project (NxtWave), GEN-AI Camp (AlgoUniversity), Git and GitHub Bootcamp (Udemy), Java Programming (CodeChef), Google Cloud Skills Boost

LEADERSHIP & LANGUAGES

Leadership: NSS Student Coordinator, VVIT; represented Andhra Pradesh at the National Integration Camp in Bihar.

Languages: English, Telugu, Urdu, Hindi
