Shaik Mahammad Shariff

Guntur, Andhra Pradesh, India
Portfolio | LinkedIn | GitHub | CodeChef

SUMMARY

Final-year Electronics and Communication Engineering student building AI products end to end, from model to shipped interface. Experienced with Python, TypeScript, Next.js, machine learning evaluation and automated testing. Seeking AI product and software engineering roles.

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT) | B.Tech, Electronics and Communication Engineering | 2023 - Expected May 2027 | CGPA 8.12/10

PROJECTS

RecoverFlow AI (Razorpay AI Buildathon, Track 3) | Next.js 16, React 19, TypeScript, Prisma | Code | Demo
- Built a merchant console for revenue recovery cases, with integer-paise accounting to avoid floating-point rounding errors.
- Implemented L2 logistic calibration, Thompson Sampling channel selection, a transactional outbox and a SHA-256 audit chain.
- Wrote 601 Vitest tests across 93 suites and 82 Playwright tests. Working demo; live payment recovery is not enabled.

NeuroLearn AI | Next.js 15, React 19, TypeScript, Playwright | Code
- Built a learning workspace with diagnostics, deterministic grading and English, Telugu and Hindi teaching.
- Engineered a research coordinator with SSRF-safe querying across Wikipedia, OpenAlex, Crossref and OpenStax.
- The public demo uses curated fixtures. Optional provider inference is not yet verified live.

ResumeScore | Next.js 16, React 19, TypeScript, Mozilla PDF.js, Vitest | Code | Demo
- Built resume quality and job-match scoring that runs in the browser by default, keeping resume text on the user's device.
- Added extraction review, local editing and optional consent-based Claude and Gemini critique.

CreditGuard AI | Python, Scikit-Learn, SHAP, Flask, Docker, GitHub Actions | Code | Demo
- Trained a calibrated Random Forest on about 438k records: 0.7865 ROC-AUC on a holdout set with 1.7% defaults.
- Tuned a 5:1 cost-sensitive threshold, lifting default recall from 24.39% to 35.77%, with local SHAP explanations.

Amazon ML Challenge 2026: Entity Resolution (private code) | Python, LightGBM, RapidFuzz, PyArrow
- Built a 19-feature LightGBM pipeline over 207M+ candidate links for 1.73M anchors: 0.8879 Macro F0.5 on a local holdout, with 39 automated tests.

EXPERIENCE

AIML Domain Intern, SkillWallet / SmartBridge | June 2026 - 31 July 2026
- Debugged and validated Scikit-learn feature engineering and preprocessing pipelines in Python, using Git-based workflows.

Artificial Intelligence Intern, CodTech IT Solutions | 22 June 2026 - 20 July 2026
- Completed a four-week internship covering machine learning concepts and Python problem-solving.

Prompt Engineering Intern, SkillCraft Technology | 1 June 2026 - 30 June 2026
- Designed, optimized and evaluated prompts and AI workflows for large language models.

AWS Data Engineering Virtual Intern, EduSkills
- Explored AWS services for data storage, processing and analytics.

SKILLS

Languages: Python, TypeScript, Java, C, SQL
AI and ML: Scikit-Learn, LightGBM, SHAP, Pandas, NumPy, model calibration, prompt engineering
Web: Next.js, React, Node.js, Flask, Prisma, REST APIs
Tools: Git, GitHub Actions, Docker, Vercel, AWS, Vitest, Playwright

CERTIFICATIONS

AWS Certified Cloud Practitioner (issued July 2026, valid through July 2029); AWS Academy Graduate, Data Engineering; GitHub Foundations; Google Cloud Skills Boost; Palo Alto Networks Cybersecurity Fundamentals; Forage job simulations with Tata and Datacom.

ACHIEVEMENTS AND LEADERSHIP

- CodeChef 2-star, rating 1455, 900+ problems solved.
- NSS Student Coordinator at VVIT: 20+ community service events and 100+ volunteers.
- Represented Andhra Pradesh at the National Integration Camp, Bihar.

LANGUAGES

English (Professional), Telugu (Native), Urdu (Native), Hindi (Professional)
